

Music Transcription Studio User Guide

1. Upload Your Audio

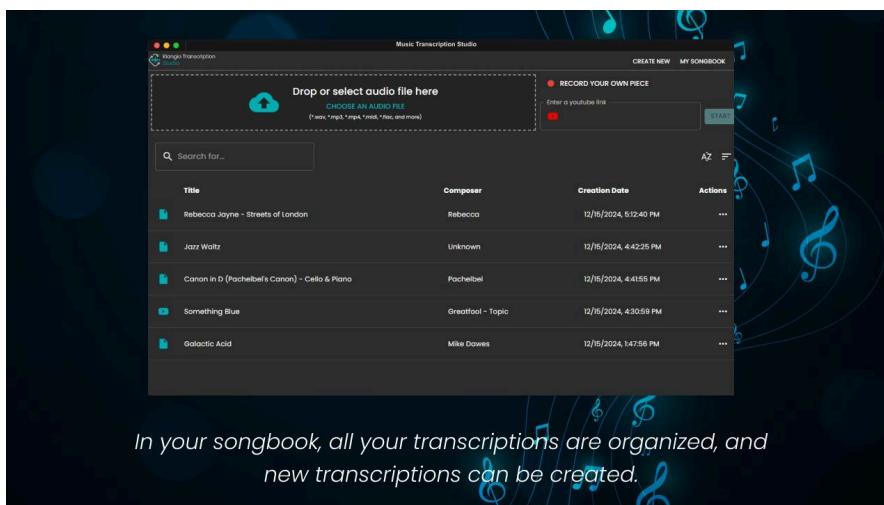

Start by uploading your audio file, recording a live piece, or entering a YouTube link.

- Supported formats: **.wav**, **.mp3**, **.mp4**, **.midi**, **.flac**, and more.

2. Organize Your Transcriptions

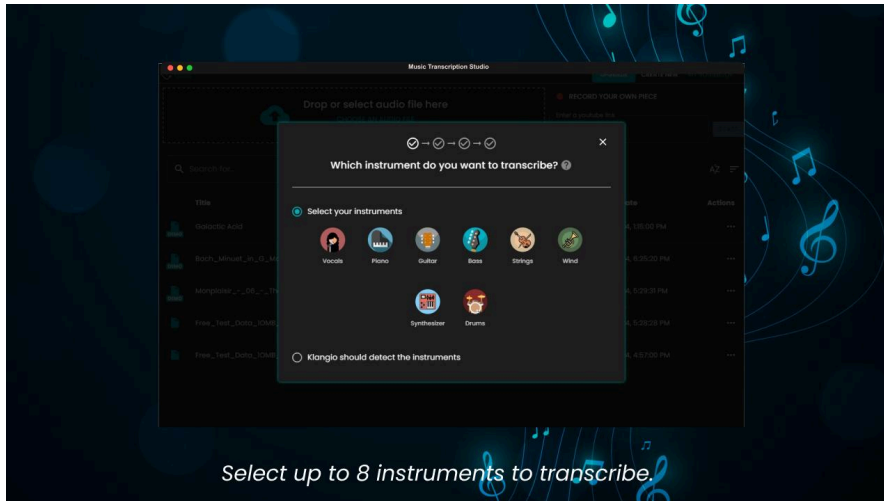

All your transcriptions are saved in your **Songbook** for easy access and organization. Create new transcriptions or edit existing ones seamlessly.

3. Select the Instruments

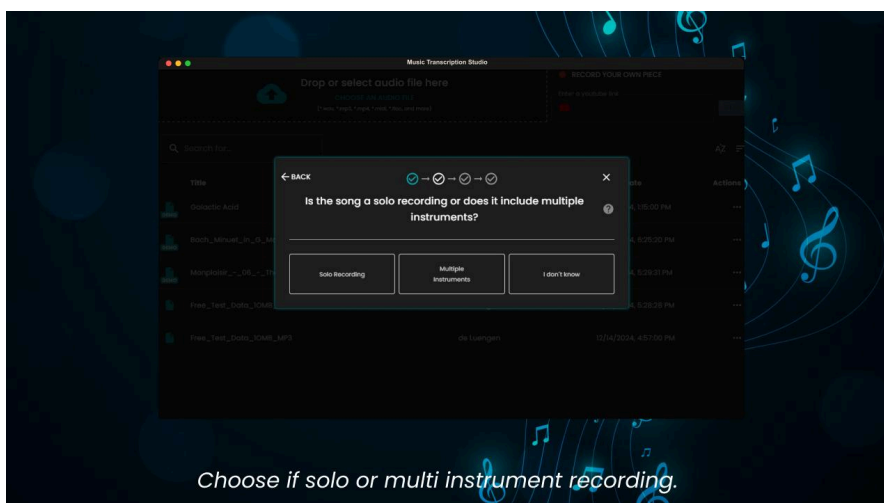

Choose the instrument(s) you want to transcribe. You can select up to **8 instruments**, or let Klangio auto-detect them for you.

- Options include Vocals, Piano, Guitar, Drums, Bass, Strings, Wind, and Synthesizer.

4. Choose Solo or Multi-Instrument Recording

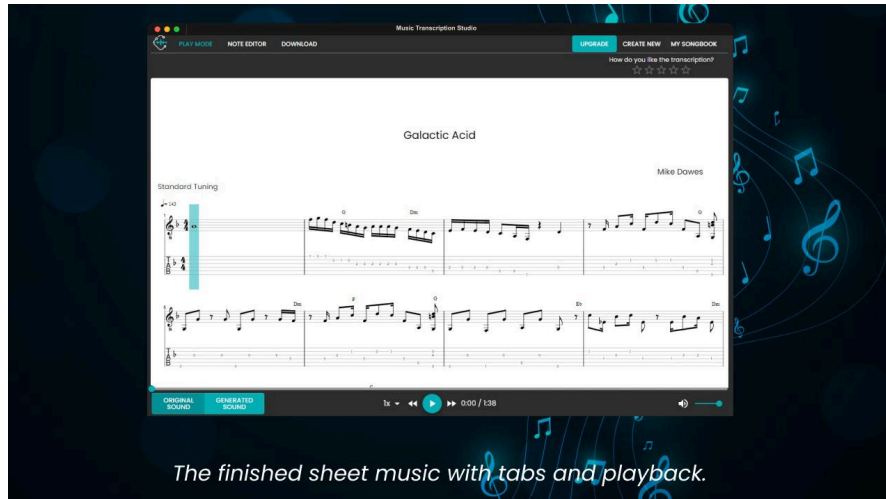

Specify whether the song is a **solo recording** or contains multiple instruments for more accurate transcription.

5. View and Edit Your Transcription

Once processed, your transcription will appear as sheet music with options for:

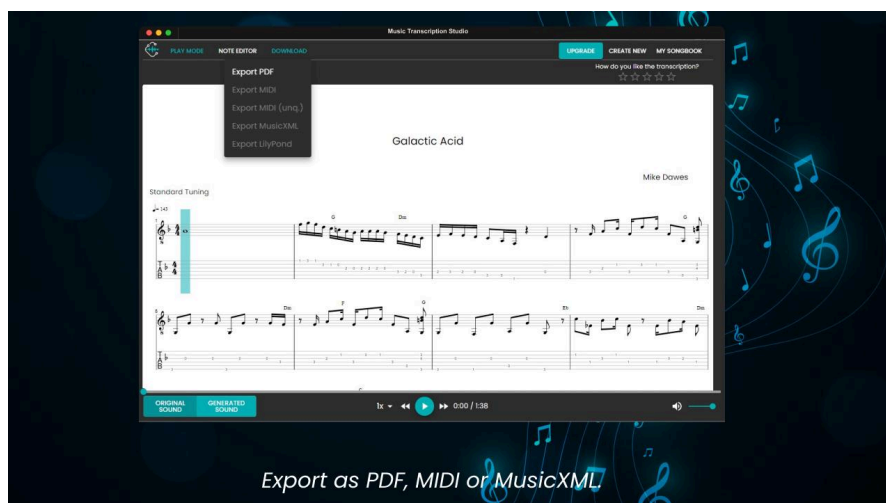

- **Playback:** Listen to the original or generated sound.
- **Edit Notes:** Adjust time signatures, key, and notes using the built-in editor.

6. Export Your Transcription

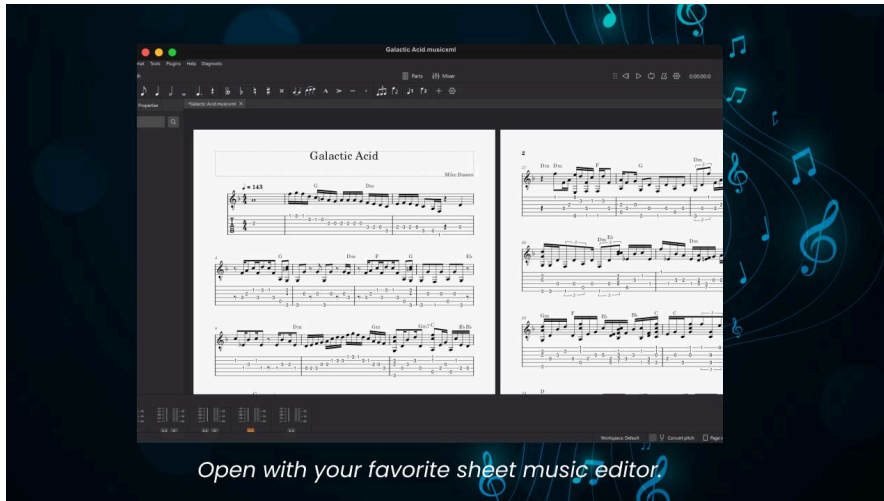

Download your transcription in multiple formats:

- **PDF** (Sheet Music)
- **MIDI**
- **MusicXML**
- **GuitarPro**

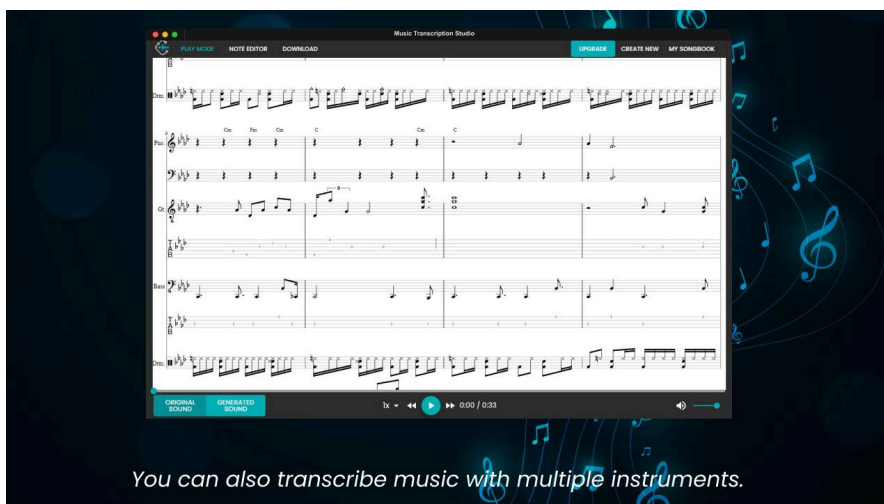

7. Use Your Favorite Sheet Music Editor

Exported files can be opened and edited in any popular sheet music editor.

8. Transcribe Multi-Instrument Music

Music Transcription Studio supports multi-instrument recordings and accurately separates each instrument into its own line of notation.

Summary:

With Music Transcription Studio, you can effortlessly transcribe any audio into sheet music, playback, and export files for further use. Its AI-powered engine handles solo and multi-instrument recordings, helping musicians save time and bring their ideas to life.
