

# Guitar2Tabs User Guide

## Introduction

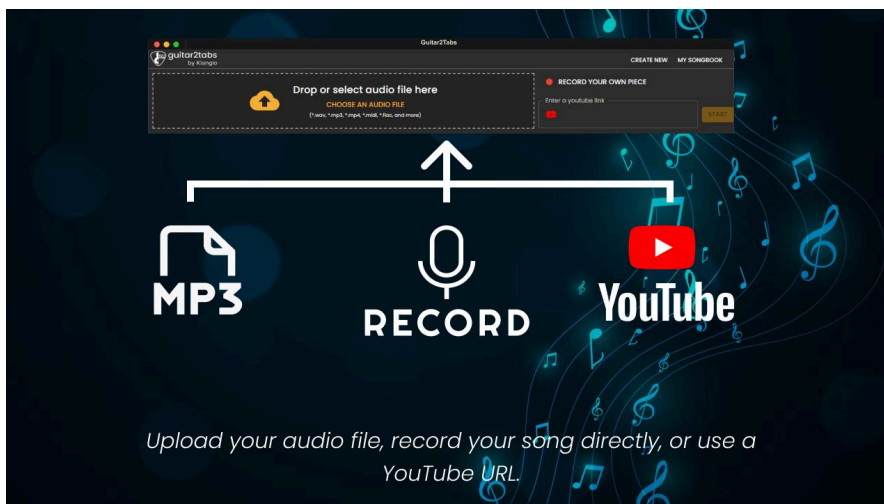

Guitar2Tabs allows you to transcribe guitar performances into accurate sheet music and tablature (TABs) using advanced AI technology. Follow this guide to get started quickly and make the most of Guitar2Tabs.

---

## 1. Upload or Record Your Music

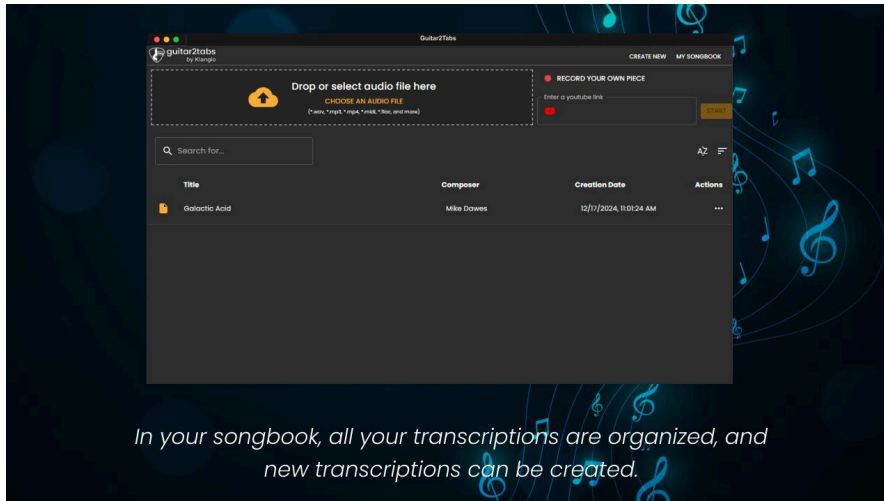

To begin, Guitar2Tabs offers three options for input:

- **Upload an audio file** (supports formats like `.mp3`, `.wav`, `.mp4`, and more).
- **Record a new piece** directly within the app.
- **Paste a YouTube URL** to transcribe music from a video.

## 2. Organize Your Transcriptions

Once uploaded or recorded, your transcriptions are organized in the **Songbook**. You can create new transcriptions or search for existing ones.

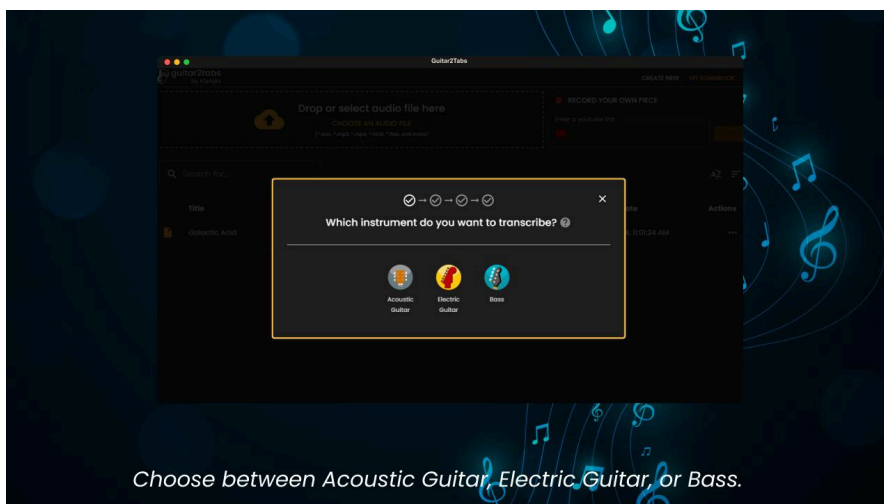

- **Title, Composer, and Creation Date** are listed for easy management.

### 3. Choose Your Instrument

Select the instrument you want to transcribe. Guitar2Tabs supports:

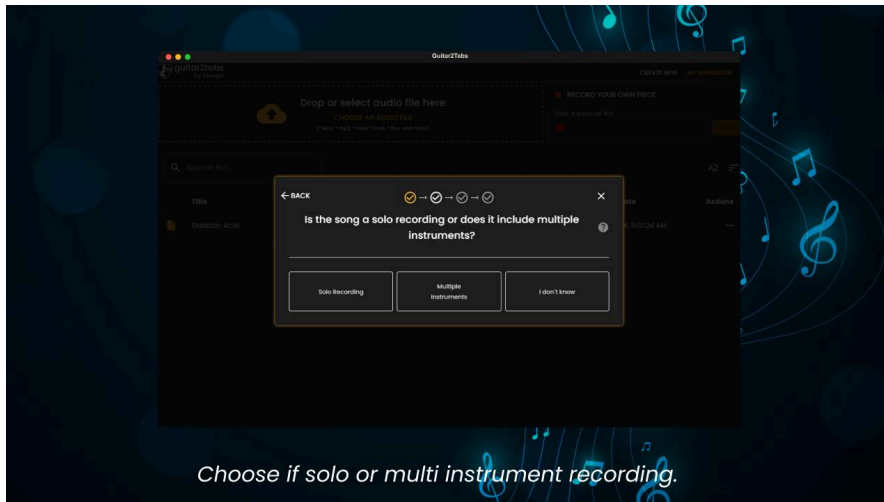

- **Acoustic Guitar**
- **Electric Guitar**
- **Bass**

Click the icon that matches your instrument.

### 4. Identify Recording Type

Decide whether your piece is a **solo recording** or includes **multiple instruments**. This helps the AI optimize transcription accuracy.

Options:

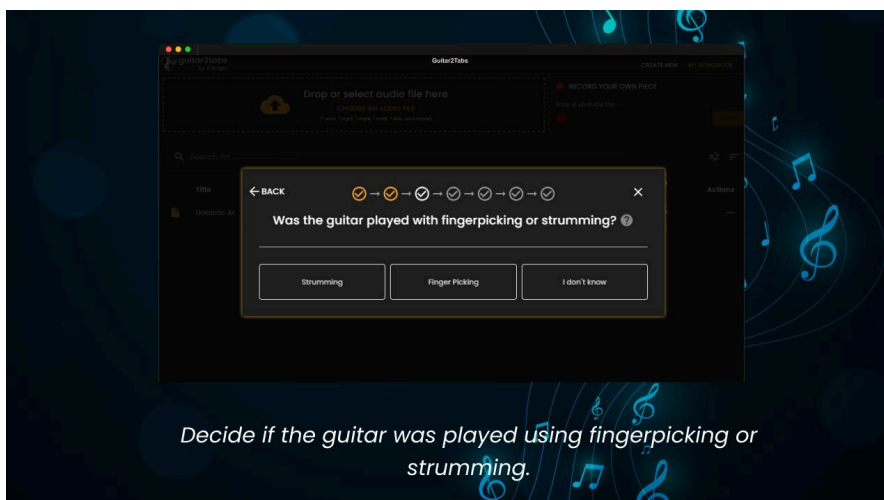

- **Solo Recording**
- **Multiple Instruments**
- **I don't know**

---

## 5. Fingerpicking or Strumming

Specify how the guitar was played:

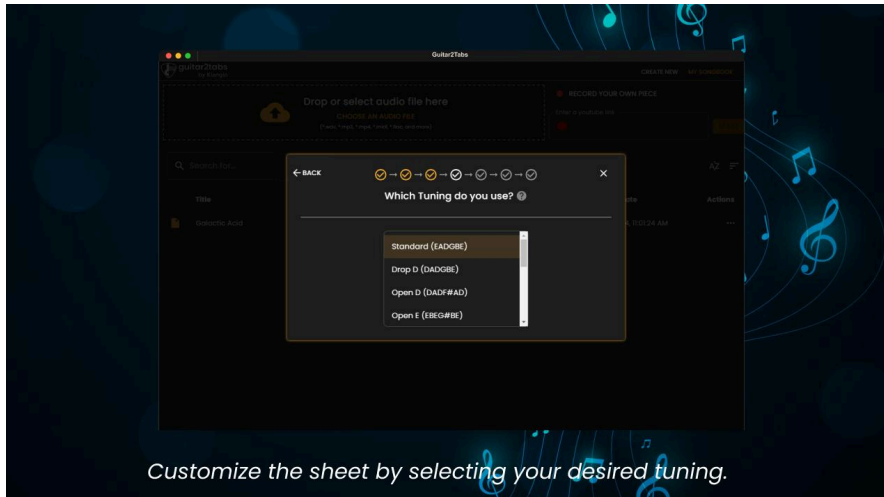

- **Strumming** for chords and rhythm.
- **Fingerpicking** for polyphonic and detailed lines.

Select the appropriate option, or choose **I don't know** if unsure.

## 6. Select Tuning

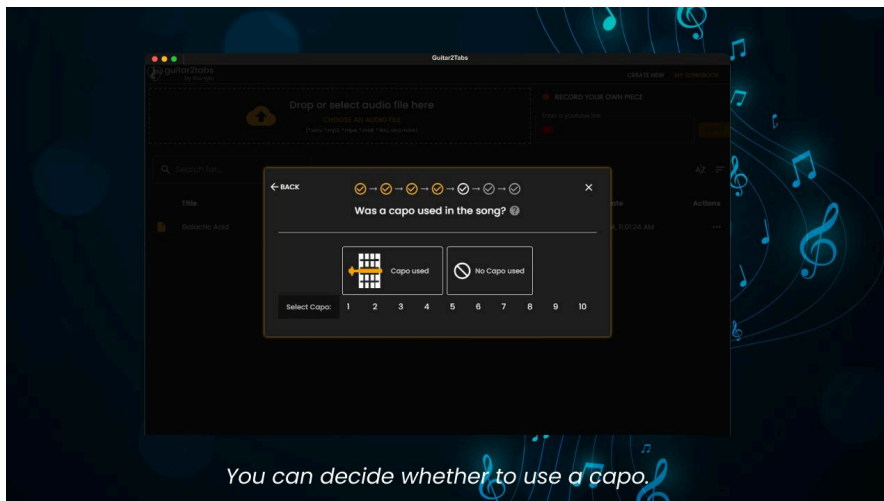

Choose your guitar's tuning. Guitar2Tabs supports standard and alternate tunings, such as Drop D, Open D, and more.

*Customize the sheet by selecting your desired tuning.*

## 7. Capo Usage

If a capo was used, specify its position. Guitar2Tabs supports capo positions from 1 to 10.

*You can decide whether to use a capo.*

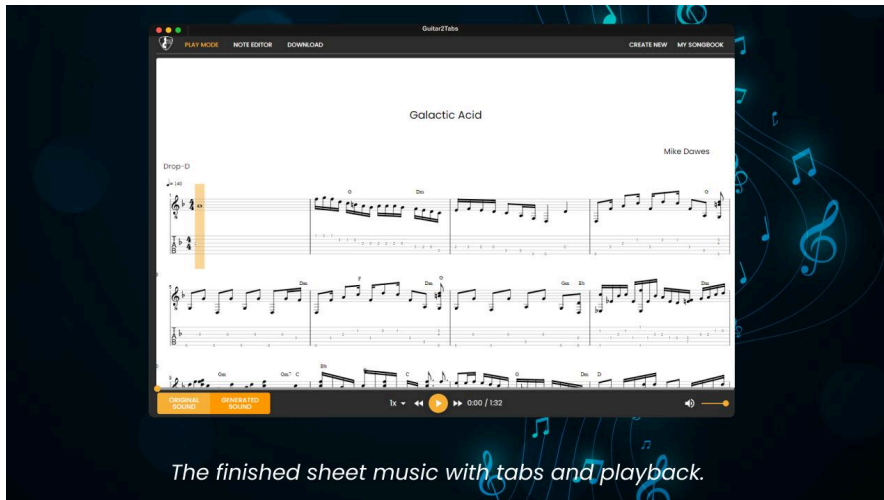

1. Select **Capo Used** or **No Capo Used**.
2. Choose the **capo fret**.

---

## 8. View the Finished Transcription

Once processed, the final transcription will appear as:

- Sheet music (standard notation)
- Guitar tablature (TABs)

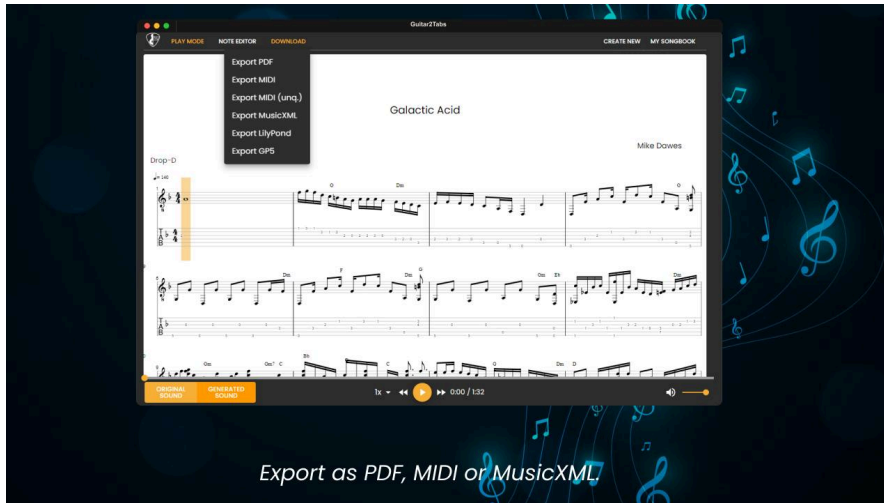

Use the playback feature to listen to both the **original sound** and the **generated sound** for verification.

---

## 9. Export Your Transcription

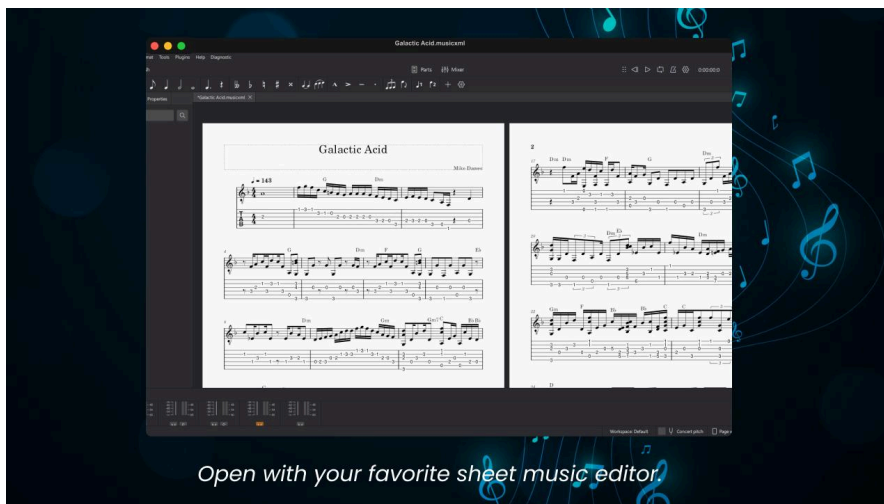

Guitar2Tabs allows exporting transcriptions in multiple formats:

- **PDF** for sheet music.
- **MIDI** for playback in DAWs.
- **MusicXML** for use with music notation software.
- **GuitarPro (GP5)** format.

## 10. Open with Sheet Music Editors

Your exported transcriptions can be further edited or refined in your favorite sheet music editor (like MuseScore or GuitarPro).

## Conclusion

Guitar2Tabs simplifies transcription for acoustic guitar, electric guitar, and bass, even supporting capo usage and a variety of tunings. Start transcribing your music today and unlock professional-quality sheet music and tablature with ease!

Enjoy transcribing! 🎵
