

Instructions for Instrument Installation

- 1 Download the Swell Installer for your OS
- 2 Follow the installer instructions to install the VST/AU files to their respective folders
- 3 Restart your DAW and let it rescan for Swell
- 4 Open Swell in an instrument track
- 5 The plugin will say "Please click below to install the samples from the downloaded archive or point to the location where you've already installed the samples"
- 6 Select "Install Samples"
- 7 The screen will prompt you "Please select the Swell Resources 1.0.0.hr1 file that you've downloaded"
- 8 Click "Ok"
- 9 In the popup that follows, select the "Swell_1_0_0_Samples.hr1" which was installed on your Desktop
- 10 The screen will prompt "Please select the location where you want to install the samples"
- 11 Click "Ok"
- 12 Select a folder on your computer (or external drive) where the samples will be installed
- 13 In the dialog that says "Install Sample Archive", click "Ok" and wait for the Total Progress bar to complete
- 14 Once finished, you may need to restart the plugin for it to start working
