

Honey Mustard

INTRODUCTION:

Sweeten your voice with Gooley's Honey Mustard.

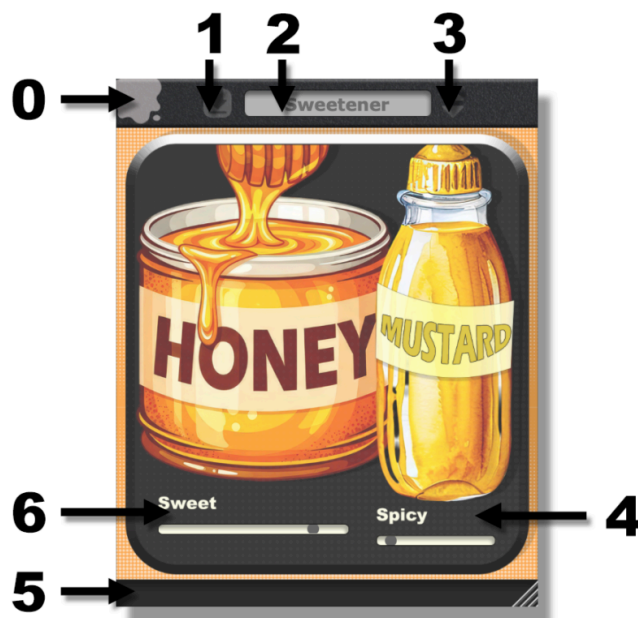

Honey Mustard is a simple audio plug-in that combines filtering and dynamics to make your voice present and clear.

Gooley's Honey Mustard only involves two controls: Sweet and Spicy. When it's time to sweeten up vocals, gently press and slide the control up the plug-in to add crispness, clarity, and dynamic control. If you are interested in something a bit more adventurous, then engage the spicy control.

Be heard in the crowd, captivate your audience, and be present with Honey Mustard.
