

BRIGHTER

INTRODUCTION:

Brighter is a single knob plug-in. It adds shelving and subtle non-linearities to boost the high-frequency content. The plug-in is simple to use and easy to mix with your music.

OVERVIEW

(1) The Gooley Icon: When hovering the mouse over the icon, a tooltip will appear, which will provide the version number of the product.

- (1b) When clicking on the Gooley icon the plugin will be bypassed. To indicate it is bypassed, the icon will change color, and a tooltip will appear.
- (2) Preset Save Icon: Click to save a preset. Presets will be stored in a local user file folder.
- (3) Preset Scroll Buttons: click to scroll through the list of presets.
- (4) Preset Menu: click to see the full list of saved presets. Note: Press Ctrl+z to undo and Ctrl+y to redo.
- (5) Brighter Slider: adds an additional 6db of saturation as the slider is turned up, and an additional, multiplicative, 6db of shelving.
- (6) Bee Button: pressing this button will toggle on the bee. When the bee is engaged, there's a base of 6db added to the signal at 5,000 hertz, and an additional 6db is mixed in as the control goes up.
