4. Enjoy the Magneta!

KEY FEATURES

1. **8 Fully Editable Lo-Fi Modules:** Shape your own flavor of degradation. Control filters (Hi-Cut / Lo-Cut), analog overdrive (Drive), pitch fluctuation (Melt), physical tape damage (Dmg), plus age and noise artifacts (Age, Dust, Hiss). Engage and blend each module with surgical precision.
2. **Tape Type Selection:** Need the standard tape? Choose the classic iron tape (STD). Want more high-end sparkle and cleaner saturation? Switch to the chrome cassette (CrO2).
3. **Split Section (Stereo Magic):** Three unique modes (Split A, B, C) utilizing precise, millisecond delays (the Haas effect). Instantly widen your stereo image and build an incredible, three-dimensional space around your instruments by subtly shifting the left or right channel.
4. **Tone Shaping (Aura, Air, Comp):** Dial in the perfect vibe for your tracks. The Aura and Air switches let you control harmonics and the breath of top-end ambience, while the built-in Comp glues everything together into a thick, cohesive analog signal.
5. **Intelligent Randomizer:** Lacking inspiration? A single click of the Random button generates unique, randomized settings for the effect section (safely bypassing your master parameters), giving you instant and inspiring results. Hit Reset to instantly return to the starting point.
6. **Complete Master Control:** A built-in Limiter to protect against digital clipping, a Blend knob for perfect parallel processing (Dry/Wet), and precise control over Volume, Width, and L/R Balance.
