Taylor Davis Violin

Muse Sounds Edition

Taylor Davis Violin

Muse Sounds Edition

The **Taylor Davis Violin - Muse Sounds Edition** is crafted exclusively for the Muse Sounds engine: derived from the Cinesamples library "Artist Series - Taylor Davis" and carefully optimised for playback from notation.

Taylor Davis is an American violinist, arranger, and composer. Davis is best known for her violin-covers of music from video games featured on her YouTube channel, which has over 2.6 million subscribers. She also features performances of her own arrangements of music from films and musicals. She plays a hand made Italian violin from the 1780s, which is sampled in this library.

Instrument Included

Solo Violin

Key Articulations

Advanced Legato: Ensures smooth, connected notes during regular playing.
Fast Runs Mode: Triggered for notes played in quick succession.
Staccato
Accent
Marcato
Pizzicato
Portamento

Special
Open Strings - Accessible with Staff text in MuseScore Studio

Accessing Playing Techniques in MuseScore

Many of the playing techniques in MuseScore Studio are accessible through the **Staff Text** feature. To apply a playing technique, first select the starting note for the technique, then assign Staff Text to it. Next, click on the speaker icon above the staff of the assigned note to open the Playing Techniques menu. From there, you can select the desired playing technique. If there are more than eight techniques available, you may need to scroll to see all options.

Playback Details

By default, these strings play back with a moving legato. For phrases where individual notes are faster, the playback automatically switches to a special "Fast" mode.

The samples contain up to three dynamics, from pp to ff. For short notes, there are up to four repetition samples, enhancing realism during repeated notes.

ⓘ   Tip: For faster writing, consider using shorter, more defined samples, such as marcatos or staccatos. By writing "marcato" in the text, all notes until the next text instruction will play back using this articulation. You can optionally hide this text if you don't want it visible in the printed score. If you need additional speed or dexterity, give this a try!

About Muse Sounds Editions

Muse Sounds Editions are exclusively created editions of sample libraries, designed to work with the Muse Sounds Engine, found inside MuseScore Studio and StaffPad.

These editions are derived from the same content, but are not compatible with Kontakt or VST versions of the same library.

The Muse Sounds concept is to distill the technical and sonic achievements of complex, vast sample libraries, which were often created to be triggered via complex MIDI programming, into a simple, musical and intuitive experience for composers who work with notation.

The Muse Sounds team is proud to work with prestigious sample developers, and to bring these beautiful sounding creations to life for the notated page.

Thank you for supporting Muse Sounds!
