# Tina Guo Cello

Muse Sounds Edition

# Tina Guo Cello

The **Tina Guo Cello - Muse Sounds Edition** is crafted exclusively for the Muse Sounds engine: derived from the Cinesamples library "Tina Guo Acoustic Cello" and carefully optimised for playback from notation.

Tina Guo has developed an international multi-faceted performance and recording career as a classical acoustic cellist, heavy metal electric cellist, erhuist, and composer. Her distinctive sound and improvisatory style have been featured in major motion picture, television, and game scores. As Tina's distinguishes herself most remarkably through her live musical performances, her numerous appearances on arena stages have naturally taken her around the globe. Tina's cello work (acoustic and electric) can also be heard on major video game titles.

## Instrument Included

Solo Cello

## Key Articulations

Advanced Legato: Ensures smooth, connected notes during regular playing.
Fast Runs Mode: Triggered for notes played in quick succession.
Staccato
Accent
Marcato
Pizzicato
Harmonics
Sul Pont

**Special**
Open Strings - Accessible with Staff text in MuseScore Studio

**Presets**

Espressivo

Normale

# Accessing Playing Techniques in MuseScore

Many of the playing techniques in MuseScore Studio are accessible through the **Staff Text** feature. To apply a playing technique, first select the starting note for the technique, then assign Staff Text to it. Next, click on the speaker icon above the staff of the assigned note to open the Playing Techniques menu. From there, you can select the desired playing technique. If there are more than eight techniques available, you may need to scroll to see all options.

# Playback Details

By default, the cello plays back with a moving legato. For phrases where individual notes are faster, the playback automatically switches to a special "Fast" mode.

There are up to eight repetition samples, enhancing realism during repeated notes.

ⓘ　Tip: For faster writing, consider using shorter, more defined samples, such as marcatos or staccatos. By writing "marcato" in the text, all notes until the next text instruction will play back using this articulation. You can optionally hide this text if you don't want it visible in the printed score. If you need additional speed or dexterity, give this a try!

## About Muse Sounds Editions

Muse Sounds Editions are exclusively created editions of sample libraries, designed to work with the Muse Sounds Engine, found inside MuseScore Studio and StaffPad.

These editions are derived from the same content, but are not compatible with Kontakt or VST versions of the same library.

The Muse Sounds concept is to distill the technical and sonic achievements of complex, vast sample libraries, which were often created to be triggered via complex MIDI programming, into a simple, musical and intuitive experience for composers who work with notation.

The Muse Sounds team is proud to work with prestigious sample developers, and to bring these beautiful sounding creations to life for the notated page.

Thank you for supporting Muse Sounds!
