Ambience

 Muse Sounds Edition

The **Ambience** library is crafted exclusively for the Muse Sounds engine by the Muse Sounds team and carefully optimised for playback from notation.

Ambience is a mesmerizing and transformative collection of soundscapes, pads, textures and instruments meticulously crafted to evoke a profound sense of tranquility and mindfulness. This exquisite sound library is perfect for musicians, composers and producers seeking to add a touch of serenity to their creations.

In addition to these organic instruments, Ambience also includes a variety of synthetic textures and pads to enhance and elevate your compositions. These ambient elements blend seamlessly with the natural sounds, creating an immersive auditory experience that will transport your audience to a world of tranquility and harmony.

Accessing Presets in MuseScore

Many of the presets and playing techniques in MuseScore Studio are accessible through the **Staff Text** feature. To apply a playing technique, first select the starting note for the technique, then assign Staff Text to it. Next, click on the speaker icon above the staff of the assigned note to open the Modify sound menu. From there, you can select the desired playing technique or preset. If there are more than eight techniques available, you may need to scroll to see all options.

Playback Details

Many of the sounds in this library are percussion-type such as the Gongs and will show a percussion map at the bottom of MuseScore Studio when entering notes.

Other sounds are chromatic instruments such as Synths and Pianos that are best used with a grand staff assigned to the instrument.

It may take some time to familiarize yourself with the sounds and what staff type to use, as there is no default staves for this library. This means you will need to assign a flute, percussion instrument or piano to your score and change the instrument in the mixer to an Ambience instrument afterwards.

 Tip 1: Ambience works well with long sustained sounds where the sound is able to evolve.

Tip 2: Layering sounds is another great way to create more complex sounds. Give it a try!

About Muse Sounds

Muse Sounds is a new label of high quality playback instruments for MuseScore Studio and StaffPad.

Painstakingly recorded and edited specifically for the custom and revolutionary playback engine that powers these applications, they are capable of rendering incredibly lifelike results which breathe realism and emotion into your compositions.

Ambience

 Muse Sounds Edition

The first releases from Muse Sounds cover the symphony orchestra, choral voices and essential guitars. These beautifully crafted instrument packs are available exclusively in Muse Hub, many of which are free.

Thank you for supporting Muse Sounds!
