Nus, Noos
Tus, Toos

Notice that there are multiple ways to spell lyrics. “Vi” and “Vee”, for example, will sing the same thing.

 Tip: VOXOS has natural hall reverb in the samples and sounds best when reverb is either turned off or kept to a minimum to allow the natural ambience to come through.

Playback Details

By default, the Ah samples will play if no lyrics are selected, except for the Solo Boy, which is set to Ooo.

Sopranos, Altos, Tenors, Basses, Solo Soprano and Boys Choir can only select between Ahh and Ooo lyrics, but defaults to Ahh.

Solo Boy sounds with Ooo only, not matter what lyric is selected.

Full Chorus, Men and Women include the largest selection of lyrics as listed above. Simply assign a lyric to a note that matches one from the list to hear it sung. It is recommended to use the Men and Women Instruments over the Full Chorus. While Full Chorus uses the same samples as the Men and Women, the Men and Women do not overlap the samples in the middle register where the men are naturally louder the way Full Chorus does.

 Tip: With a bit of patience and clever note writing, lyric types can be combined to form pseudo-words and phrases. Have fun!

About Muse Sounds Editions

Muse Sounds Editions are exclusively created editions of sample libraries, designed to work with the Muse Sounds Engine, found inside MuseScore Studio and StaffPad.

These editions are derived from the same content, but are not compatible with Kontakt or VST versions of the same library.

The Muse Sounds concept is to distill the technical and sonic achievements of complex, vast sample libraries, which were often created to be triggered via complex MIDI programming, into a simple, musical and intuitive experience for composers who work with notation.

The Muse Sounds team is proud to work with prestigious sample developers, and to bring these beautiful sounding creations to life for the notated page.

Thank you for supporting Muse Sounds!
