

# CineWinds

 Muse Sounds Edition

---

The **CineWinds - Muse Sounds Edition** is crafted exclusively for the Muse Sounds engine: derived from the CineWinds flagship library "CineWinds" and carefully optimised for playback from notation.

CineWinds is an orchestral woodwinds library recorded in the legendary MGM Scoring Stage at Sony Pictures Studios in Los Angeles. CineWinds covers the essentials of the orchestral woodwinds section with a focus on the simplicity and unparalleled recording quality. Each instrument has been meticulously sampled to cover the nuance of the woodwind section.

## Instruments Included

Alto Flute	Eb Clarinet
Bass Clarinet	English Horn
Bass Flute	Flute
Bassoon	Oboe 1
Clarinet	Oboe 2
Contrabass Clarinet	Piccolo
Contrabassoon	

## Key Articulations (some variance per instrument - not all articulations are in all instruments)

Advanced Legato: Ensures smooth, connected notes during regular playing.

Fast Runs Mode: Triggered for notes played in quick succession.

Sustain - vibrato and non-vibrato

Accent

Staccato

Staccatissimo

Marcato

Trills - Half and Whole

## Playback Details

The sustains are sampled in up to three dynamics, from pp to ff, and smoothly morph between them to produce realistic crescendos and decrescendos. For short notes, there are up to four repetition samples, enhancing realism during repeated notes.

 **Tip:** For faster writing, consider using shorter, more defined samples, such as marcatos or staccatos. By writing "marcato" in the text, all notes until the next text instruction will play back using this articulation. You can optionally hide this text if you don't want it visible in the printed score. If you need additional speed or dexterity, give this a try!

## About Muse Sounds Editions

Muse Sounds Editions are exclusively created editions of sample libraries, designed to work with the Muse Sounds Engine, found inside MuseScore Studio and StaffPad.

These editions are derived from the same content, but are not compatible with Kontakt or VST versions of the same library.

The Muse Sounds concept is to distill the technical and sonic achievements of complex, vast sample libraries, which were often created to be triggered via complex MIDI programming, into a simple, musical and intuitive experience for composers who work with notation.

The Muse Sounds team is proud to work with prestigious sample developers, and to bring these beautiful sounding creations to life for the notated page.

Thank you for supporting Muse Sounds!
